

Enduring Connection Policy - 2.1 (ECP-2.1) 2020 Category A Batch

September 2021

Disclaimer

All information provided is for information purposes only and does not constitute a legal contract between either System Operator and any person or entity unless otherwise specified. Prior to taking business decisions, interested parties should not rely on the data set out in this information paper as a substitute for obtaining separate and independent advice to the matters covered by this document. Information in this document does not amount to a recommendation or advice in respect of any possible investment. The use of information contained within this document for any form of decision making is done so at the user's own risk.

Background

ECP-2 is the second stage of the CRU's development of enduring connection policy in Ireland. On the 10th June 2020 the CRU published their decision¹ on ECP-2, which set policy for at least three annual batches of connection offers (ECP 2.1, ECP-2.2, and ECP-2.3).

The application window for the first batch, ECP-2.1, closed September 30th 2020. The System Operators (SOs) have used the ECP-2 decision paper¹ and subsequent ruleset² to determine which applicants have been initially successful in making the list of 85 projects due to receive connection offers under Category A.

This report contains the list of applicants that will be processed under Category A as part of the 2020 ECP-2.1 batch following payment of the balance of application fees to the relevant SO. As per the decision paper, the first 25 projects in category A were selected on the basis of renewable output, with the projects having the largest volume of renewable GWhrs/yr generated being granted the highest priority. The subsequent 60 projects were selected in order of planning permission grant date. As there were less than 10 primarily storage and other system service technology projects in this list of 85, this selection criteria did not impact the list of successful applicants.

Please note that the projects in Category A may change should projects not proceed with their application, or no longer be deemed eligible.

Applicants are summarised in table below:

Generator Type	Total Applications	Total Sum of MEC (MW)
Battery	1	60
CCGT	1	16
CHP	2	620
Gas	1	80
Hybrid Solar and Battery	1	77
Hybrid Wind and Battery	1	106
Hybrid Wind and Solar	1	55
Solar	39	883
Wind	17	668
Total Applications	64	2564

ECP-2.1 –List of Projects for Category A

*Please note that the 'assumed nodes' have been assigned based on Gate 3 Nodal Assignment Rules and are for guidance purposes only. They are subject to change once studies commence.

** Please note that 'Offer Dates' are a reasonable estimate and to be used for guidance purposes only. Offer dates remain subject to review and may change after studies commence and the complexity of the node is confirmed.
