

### ECP 2.2 IE Wind & Solar Draft Generation Assumptions

Generation < 1 MW has not been modelled as part of the ECP 2.2 Constraint Analysis.

This data has been collated for the purpose of ECP 2.2 constraint modelling only. If any significant discrepancies are noted please immediately contact info@eirgrid.com.

\* Indicative residual capacity to meet 5 GW. \*\*Maximum Export Capacity (MEC) has been rounded up for reporting purposes, exact MEC figures have been used within the model. Data freeze date: 31/07/2022.

\*\*\*For the sole purpose of the ECP 2.2 constraints modelling - the priority status assumption is based on whether the unit was connected before the date 04/07/2019, as referenced in Article 12, EU Regulation 2019/943.

Area	Node	Generation Type	Name	System Operator	Connection Status	Processing Type	Maximum Export Capacity (MW)**	Controllability Status (Y/N)	Priority/Not-Priority***
A	Corderry	wind	Altagowlan (1)	DSO	connected	Pre-Gate	8	Y	wind priority
H1	Thurles	wind	An Cnoc	DSO	connected	Gate 3	12	Y	wind priority
