NOTES

1. FAQ or Firm Access Quantity is the level of firm financial access available in the transmission network for a generator.
2. Available FAQ is the FAQ available in the actual transmission network existing at the time of the study.
3. Scheduled FAQ is a forecast outlook of the FAQ available in the future and is subject to the completion of specific transmission reinforcements.
4. In a small number of instances, FAQ dates for some generators have changed since the December 2012 publication of this report following the completion of the associated transmission reinforcements (ATR) analysis.
